PROVINCIAL LIBRARY EDMONTON ALB - 1929

Ratepayers Meeting

Mayor Cope Delivers Impressive Speech

One of the best ratepayers meetings ever held in Raymond took place last Friday night at the high school

Mayor Cope, in the chair, called for nominations for a chaiman. Geo. E. Court was elected by acclamation. J. W. Evans was named and elected as secretary-treasurer. O.H. Snow then read the financial statement of the Town for the year ending December 31, 1928.

After some discussion the report was accepted. The discussion touched the following points: waterworks, poll tax, weeds, bank loans, electric lights, increase of taxes, land values out of town, and comparison of assessments in 1923, 1926 and 1923.

Mr. L. L. Pack pointed out that when the uncollected taxes reach $51,000 there is every reason to believ that taxes are too high, and beyond the ability of people to pay. He said the school board was cutting down expenses wherever possible. Mr. Pack moved that it be the sense of the meeting that we ask the town council to mnke a very sincere effort to reduce the taxes for 1929. Mr. F. T. Hoit seconded the motion.

Mr. H. S. Allen said taxes had reached the peak and more diligence should be exercised in the collection of the same. He stated that the sale of crops had been difficult and perhaps this had something to do with the amount of taxes outstanding.

Mr. A. D. Woolley spoke of the habit of buying cars and neglecting taxes.

Mayor P. W. Cope gave a report on the expense for current used in pumping the water for the town. In 1926 it cost $1,298.50. In 1927 it cost $1,604.96. In 1928 it cost $884.78

Also spoke on school taxes and town taxes saying he was willing to pay his share.

The school report was given by Mr. L. L. Pack chairman of the school board, as Mrs. Mable Powelson was absent. The report of the school board was adopted.

Mr. Chas. Fawns asked why fees were not collected at the public school. Mr. Pack answered that it was feared that some pupils would not get to school if fees were required.

Mr. A. D. Wolley moved a vote of thanks for the Mayor and council and the School board. This was heartily approved by those present.

Mayor Copes Speech

In submiting a report of the work for the year. I will not go over all the details handled by the Auditor in his report, but wish to refer to a few things to make clear to you some of the conditions of the Town as it now stands and also to state that we are living undr conditions much different to what we were ten, or even five years ago.

Mr. Gardner, the Auditor, shows collections are up, an that in some lines expenditures are also, but the Bank interest is due to the fact that in 1927, th mone's paid on notes that the School Board owed to the Sugar City M. D. No. 37, was just handled as a payment to the school board and so far as the town was concerned no interest was owing, it was paid on the School Board requisition. Because of those conditions we paid in 1927, for School operations, and borrowings of the school board, $35,375.37, and in 1928, we paid, $29,950.00, making a grand total on account of previous school borrowings, and the present needs, of $65,325.37, since the Town took over the school account in May 1927, a very necessary, but at the same time, enormous amount of money to raise.

The item of street lights referred to of $1,813.16, is an expenditure that ir continued, must always be met out of currnt revenue. There is no utility to care for it. Any other increases are nominal.

It would be unfair to compare the amount owing to Banks now of $25,420.00, with the report of conditions at the begining of 1927 when I became Mayor of th Town of Raymond, when the Bank indebtedness was shown as $7,900.00. In order to compare these, it will be necessary to add the amount the School Board was owing at that time. The School Board was owing at that time to the Sugar City M D. the sum of $6,000. to this sum was added the amount of $3,200.00, which it took to pay the December pay roll and other items which was actually borrowed on the 4th. of January 1927 from the Sugar City M. D. The three items mentioned, viz,—Owing to the Bank $7,900 owing to Sugar City, $6,000, Dec. pay roll, $3,200. The total sum of $17,100.00. When you compare this with our present bank indebtedness of $25,420.00, and when you realize that we had an outstanding cheque of $1,092.00 at the end of 1927, and about $500.00 cash to meet it with, and at the end of 1928, we had $5,797-.52 in cash on hand, you will see that we have taken care of some 1927 bills in 1928, and because so many people waited until the last day of the year to pay their taxes that the money on hand could not be applied on the notes until January 3rd., when they were reduced to where they were only about $19,000.00, it doesn't show unfavorably.

Again—There is a decrease shown in our works and property dept. but in 1927 we charged the weed work to works and property. We have in 1928, kept the expenditures in those departments apart, but if the two are added, the items in 1928 only make $6,908.89, for 1928, as against $6,825.04 in 1927, an increase of only $83.85 in 1928, and whether it was good business or not, we are under the necessity of spending about three times the amount for weed eradication in 1928 than we spent in 1927.

Again,—As to water works operations, you find increased expenses, it has grown from $3,267.83 in 1927 to $4,064.10 in 1928. In this case however we purchased a car of lumber which is about half of it still on hand, which is being used in making manholes at main valves, to make it possible, after a leak is discovered for the valves to be turned off where otherwise we would have to dig it out as they are so rusted they cannot be turned from the surface. Also, as a Fire Engine was purchased, it was deemed essential to construct at various points, water tanks for storage, connecting them with the mains to be used at various points, as fire protective measures. The lumber for this purpose as above stated, is now on hand. Right here let me say,—I feel that the pumping stations ars very much improved, and that ths engineer in charge of the water works department has well and faithfully conducted his department, and I have nothing but commendation for him in the manner he has served us.

With reference to the Police dept. there is an increase in that dept. and a decrease in fines. The increase in expense is very largely due to extra work during the Small Pox epidemic and also a necessity for a means for him in traveling, as he was required to give aid to families in quarantine place cards up, and all this added to his expense. Long distance phone calls were also charged to the police department in tho year 1928. I can also state that the work of the police dept. has been very satisfactory, and monthly reports have been received and accepted by the council, so they have been in touch with his work at all times.

You will noto that Salaries ars slightly over 1927, but the amount is not extreme, and the council feel that they ars getting value equal to any that has been given the town in all branches of the work. It is hard to find perfect men, but I think our work is well done. The Sec. has added responsibility and I must say in spite of it, has been well up with his work. Under the Tax Recovery Act of 1922, hundreds of Caveats were filed against property in arrears for taxes, and records were not available for giving correct information. Inspector Kidney from the dept. of Municipal Affairs, in visiting our office insisted that a full record be obtained, and that all Caveats be recorded, and if taxes were paid, withdraw the Caveats. This has been done. You will note $200.00 Land Titles office fees. Our secretary has gone to Calgary, searched the Titles, made a record of all Caveats filed since Oct. 12th. 1922, and withdrawn Caveats from over three hundred fifty parcels of land during 1928. Many should havs been withdrawn in 1922. In addition to this he has always had his cash books balanced monthly, and a report has been laid before the council showing receipts and disbursements for the previous months, and any information required has been readily furnished. Further, you will find arrears of taxes up to date, on the tax roll. This could not be said at the time the present secretary took over the work. Auditor Gardner has the following to say in his Sept. 1928 Audit—"I am pleased to be able to report that the books are kept in an efficient manner. The Tax Roll appears to be satisfactory. I have instructed the Secretary in the matter of preparing a summary of the Roll at the end of the year and do not anticipate any further trouble in balancing the Roll."

I thus briefly report conditions as to finances, and work and am justly proud to say that not since the Raymond Water works has been in operation has collections from that source exceeded but little over $5,000. while this year we have $6,766.20 as collections, we have been able to sell nearly $2,000.00 in dead streets, we have made a drive, with the assistance of th Board of Trade and others, and vastly improved Broadway, and have gone forward in the work of Fire protection.

I desire in behalf of the council to express our full confidence and appreciation to the Constable, the Engineer, The Secretary-Treasurer, and the Utility man for their faithful and efficient services, and to the ratepayers who have supported us in our work.

Further,— I desire to state that it has been found necessary to increase taxes in harmony with the times, to meet much needed improvements, and the Council have felt the necessity of all work outlined, and in the main harmony has existed. We have no apology to make, and feel sure, if the public had been given less, they would have been greatly disappointed.

Raymond Wins Double Header

The local High Quint won Friday nights basketball encounter from Magrath by an uneven score of 76-11. The game was very interesting despite the uneven score. The Raymond players declare the Magrath boys make a very good little team. With more practice the team will prove formidable contenders.

The lineup of Raymond—O'Brien 16, Snow 8, VanOrman, 15, Neilson 16, Rolfson, 11, Strong, 4, Walker 0, West, 0.

Line up for Magrath—Matkin, 1, Card, 4, Meldrum, 5 Turner, 0, Ahrens 1, Bingham, 0, Harker, 0, Gibb, 0, Referee Galbraith assisted by Zemp.

The Raymond intermediates defeat Magrath easily with af score o 52-21. Magrath was handicaped some due to Coleman's illness. The score shows the brand of game put up by the Raymond 'medites and as yet Magrath have not struck the stride of Raymond.

GRIM REAPER TAKES ANOTHER RAYMOND PIONEER

William M. Palmer born December 10 1846 at Montrase Lee County Iowa in a small trapper cabin after the to Utah in 1850.

exodus from Nauvoo. He came to Utah in 1850.

When he was six years of age he was taken ill with measels which left him blind until he was twelve years old. His sight was restored through administration. He was taught the Scriptnre and hymns by his mother He began his missionary career at the age of twenty nine, travelling without purse or scrip, chiefly in the Stats of Michigan. For twelve years he was the President of the North Western States mission, having organized that mission. He was known by many as the walking Bible.

After returning from his mission he was on the General Board of the Y. M. I. A. He came to Canada in 1903 and has made his home in Raymond since. Mr. Palmer travelled in many parts of Alberta in the interest of the Sugar Beet Industry for the Knight Sugar Co. before building the first factory at Raymond. He also did a great deal of missionary work in Alberta.

He died January 25, 1929 at the age of 82. He is survived by his wife and ten children. Mrs. Ada OBrien of Raymond, Charles and Don of Los Angles, Calif. James of Aurora Utah, Parley o Barnwell, Marion of Blackie, Asael of Lethbridge, Wilfred Lesslie and Arlo of Raymond.

The funeral services were held in the L. D. S. Stake House of Raymond January 28, at 1 P. M. Bishop Walker was in charge J. F. Johnson of Barnwell, O. H. Ostland of Lethbridge Z. Jacobs of Cardston and P. J Christensen, J. W. Evans and Pres. H. S Allen of Raymond, all spoke very highly of him.

The choir rendered very good music with C. B. Strong leading and N. L Mitchell at the organ.

A solo "O My Father" was render by Mrs. Blanche Scoville.

Interment in the Raymond cemetery.

Monday Is Municipal Nomination Day

Next Monday is the day when nominations for mayor and the vacancies in the council and school board are to be made. Have you your men picked? Are the nomination papers signed? Let's have some action people, both young and old. Your vote has just as much weight as any mans. You are entitled to express your opinion for ,or against. Use your rights.

Many vital problems are coming up for both the town officials and the school board for the coming season Tax reductions in face of all the invetable community improvements. Roads, waterworks, fire fighting equipment, irrigation and many other vital problems pertaining to the town.

The suggestion of discontinuing the town irrigation is causing much comment. First and foremost most people will say no, to such a suggestion without considering the matter Here ars a few of the present difficulties. Owing to the substances of the soil in this vicinity there is not a proper subterranean drain, consequently the water soaked earth gives up its mineral matter in the form of alkali and all vegetation die. Such is the case in the north west part of town. Trees that are fifteen years old have died because of this condition. Gardens cannot successfully be grown and the apalling part is the fact that this condition is slowly but inevetably creeping over the town.

Now the weed problem could be greatly reduced if the irrigation water did not carry the seeds over he whole town.

The maintainance of ditches and culverts would be eliminated.

What would our town look like without irrigation to keep alive our trees and lawns and flowers?

The irrigation should never be dispensed with until proper means are taken to increase the present water supply through our mains so that sufficient water is available and cheap enough to justify its use for the lawns and trees.

The money now spent on irrigation if turned to build a large resivoir and filter plant would solve the problem If such a reservoir could be constructed to hold a seven months supply of irrigation water to last through the winter, sufficient water would be available in the summer.

This only one of many things the mayor and council will have to decide the coming year.

Who do you want to handle these affairs?

Splendid Program For Sunday at The 1st Ward

A program of unusual merit has been arranged for next Sunday evening at the First ward chapel in their regular monthly conjoint meeting. David H. Elton, Lethbridge, barrister will deliver a lecture on "Success." N. S. Murcovich, also a member of the Lethbridge bar, and one of Alberta's leading violinists, will render a number of selections. Mrs. D. R. Fletcher, gold medalist of the recent Alberta Musical Festival, will sing a number of solos. The First Ward committee have gone to considerable effort to secure this program and a large crowd in attendance is expected.

Stork Visits Again

Born—To Mr. and Mrs. Frank Kenny, a son, at the Card ranch. Stewart reports that this is the first baby ever born at the ancestral farm.

PALLISER AND EMPRESS EXTENSIONS

Over the signature of E. W. Beatty, chairman and president of the Canadian Pacific Railway, has come the announcement that large extensions are to be made to the Palliser Hotel at Calgary and the Empress Hotel at Vancouver and that the additional accommodation will be ready for occupancy before the penk of the present years tourist traffic. This is good news, not only to the two cities more directly concerned where a total of more than four million dollars will be spent in the work, but to a vast legion in all corners of the earth to whom the Canadian West is a lodestone.

When Calgary read of the four additional floors which will add 200 rooms with bath to the city's accommodation it thought of Stampede week, and the thousands who pour in from all points of the compass, clamouring for accommodation and joining the mill of Cowboys, Indians and old-timers who for one week drop back to the color, romance, gaiety and sport of the early 80's.

Calgary is a stendily progressive city. Its trade and commerce continue to expand. It is a great city of the plains and the Palliser will be as spacious and beautiful as is fitting to city and the times.

The "Empress" addition of 270 rooms with bath shown above will also be appreciated by an ever increasing number to whom the quiet English city of the Pacific coast holds annual appeal. The new wing will be a beautiful structure carrying out the chateau type of architecture exemplified by the old building. When, however, its walls become ivy clad and its stone lines and traceries are covered by the foliage it will lose nothing and fit still more with the background of holly hedges and box-wood trimmings.

When these two extensions are completed, Canadians may take still more pride in a chain of Canadian owned and operated hotels which extends from coast to coast and in point of view of service, comfort and appointments is second to none in the world.

Blending Red Rose Tea is an art. To obtain the fine flavor and full-bodied richness required years of experience. Every package guaranteed. 7t

Better Health In 1929

A year or two after the close of the Great War, and when it was organizing its peace programme for "the improvement of health, the prevention of disease, and the mitigation of suffering," the Canadian Red Cross Society launched a monthly magazine for the purpose of arousing public interest in the matter of individual, community, and national health. With the end of 1928 publication of this little periodical ceased, and in announcing the cessation of publication, the Red Cross stated that in the intervening years the subject of health improvement and disease prevention had made such giant strides, and so many organizations and publications were devoting their energies to the subject, while almost every daily and weekly paper regularly printed health articles, that the same necessity did not exist for the Red Cross magazine, consequently the money it cost to produce could be devoted to other purposes.

There has certainly been a gratifying increase in public interest in health matters in the years following the war. With all its awfulness, tragedies and enormous loss, the war at least served the purpose of advancing the cause of health. Today, Canada is probably the healthiest country in the world, but, even so, there is still vast room for improvement, and that improvement cannot be brought about alone by medical men, governments, hospitals, and health organizations. It rests largely with the individual.

In the past it has been true to a great extent that people only became actively interested in their health when they became sick, notwithstanding the fact that every intelligent person will frankly admit that prevention is better than cure. In all industry in this age special efforts are directed at the elimination of waste and all unnecessary costs in business. Yet loss of time, loss of efficiency, loss in production, loss of earnings by the employee and of profits by the employer, loss occasioned by increased expenses at the very time when income is decreased or stops, is the direct result of sickness. It is the cause of the greatest aggregate loss in our national life.

No better New Year resolution can be made, or observed, by the individual, or the community, than one which finds expression in a determination to safeguard health. Such a resolution finds added force at this particular time when an epidemic of influenza is again sweeping the continent, although, fortunately, of a milder type than those of some years ago. Influenza is very contagious, but, on the other hand, it can be easily combatted through the taking of very simple precautions. If it is not so combatted at its inception, it may quickly result in serious complications such as bronchitis, intestinal trouble, or pneumonia.

All health authorities are alive to the danger; so, too, are the life insurance companies, and all are engaged in extensive publicity campaigns to acquaint people of the danger and to make known to them the simple precautions they should exercise. Thousands of dollars are being spent in newspaper advertising and other forms of publicity, and it is money well spent, but it will, nevertheless, be largely wasted unless the masses of the people to whom these appeals and advice is directed profit by it.

This new year of 1929 cannot be a happy, prosperous year if sickness enters the homes of Canada, followed by death carrying off loved ones, or leaving members of the family weakened and liable to contract other forms of disease. Good health is the first essential to happiness. Without it no person, community or nation can be prosperous.

The Canadian people cannot render better service to themselves and their country than by giving immediate and constantly continuing attention to their health. By so doing they will be laying the only sure foundation to happiness, prosperity, progress.

League Of Nations

Coast To Coast Membership Drive To Take Place In April

The weekly and daily newspapers of Canada are warm supporters of the League, it was stated at the regular monthly meeting of the League of Nations Society held in Ottawa, when arrangements were discussed for the membership drive to take place next April. Throughout the length and breadth of the Dominion, it was said, editors have shown an interest in the activities of the League of Nations and in the efforts of the Society to promote it in this country. The support of the press will prove a great asset in the annual "Coast to Coast" Membership Drive due to take place on April 16th, 1929, which will be known as "League of Nations Day."

Testing Canada's Fuels

The Department of Mines has erected in Ottawa a new Fuel Research Laboratory building, which has been equipped with modern instruments and machinery for conducting extensive research on Canadian fuels—solid, liquid, and gaseous.

No man or woman should hobble painfully about because of corns when so certain a relief is at hand as Holloway's Corn Remover.

Passenger automobiles made in Germany this year number one-third more than last year.

Stern Wheel Steamboats

Last Of Picturesque River Boats Has Disappeared In B.C.

The Fraser River has seen the last of its picturesque stern wheel steamers which until now have formed a link with the romantic past, the Cariboo gold stampede and other notable events in the early history of British Columbia.

The old steamer Skeena has been sold as a cannery tender, and will be used as a bunkhouse for fishermen. She will no longer navigate the shallows and treacherous canyons of the mighty Fraser, and she was the last of her line.

Stern wheelers first commenced to operate on the Fraser in 1859.

Every careful and observant mother knows when her child suffers from worms. She also knows that if some remedy be not speedily applied much harm will result to the infant. An excellent preparation for this purpose is Miller's Worm Powders. They drive worms from the system and set up stimulating and soothing effects, so that the child's progress thereafter is painless and satisfying.

Missionary (to cannibal)—I warn you in regard to eating my brother. He will give you indigestion. He never agrees with anybody.

Minard's Liniment is good for colds.

Mink farming is rapidly developing in Alaska.

Cuticura Heals Annoying Rashes

Bathe the affected parts freely with Cuticura Soap and hot water, dry without rubbing, and anoint with Cuticura Ointment. This treatment not only soothes and heals rashes and irritations but tends to prevent such conditions.

Sample Each Free by Mail. Address Canadian Depot: "Stenhouse, Ltd., Montreal." Price, Soap 25c. Ointment 25 and 50c. Talcum 25c.

Cuticura Shaving Stick 25c.

Grand Champion Steer

Alberta Steer Is Sold For a Net Sum Of $1,250

A new record was set for Alberta in the disposal by MacKenzie Brothers, of Lacombe, of Earl Marshall the steer which recently won the grand championship at Vancouver for a net sum of $1,250. This steer which was bred by a Prince Marshall bull, owned by S. Henderson of Lacombe, weighed 1,250 lbs. and was purchased by Jackson Brothers, of Vancouver, at $1 per pound—the highest price ever paid for an Alberta fed steer.

WEAK, LISTLESS GIRLS

Need Such a Tonic As Dr. Williams' Pink Pills To Restore Health

When a girl in her teens becomes pale and sallow, especially if at the same time she shows inclination to tire easily, a listlessness and inattention to her work or studies, she needs Dr. Williams' Pink Pills, a tonic which directly and specifically corrects the condition from which she is suffering. A chemical analysis of the blood of such a girl would show it to be deficient in just the elements Dr. Williams' Pink Pills can supply. But an analysis of the blood is not needed—the physical signs are a pallor of the cheeks and lips, dark circles under the eyes, easily tired and breathless after slight exertion. Poor appetite, headaches, and sometimes fainting spells follow; often the patient is nervous and is startled at the least noise. In all run-down conditions there is no other tonic will build you up so quickly and so surely as Dr. Williams' Pink Pills. The statement of Miss Dorothy Lumblin, Bush Island, N.S., will bring hope to other weak girls. She says:—"I wish from my heart I could persuade every person who is in a run-down condition to give Dr. Williams' Pink Pills a trial. About a year ago I was a weak girl suffering from impoverished blood and a run-down system, with many of the attendant symptoms. I had often read of Dr. Williams' Pink Pills and decided to take them, and after using six boxes I feel as well and strong as ever. Dr. Williams' Pink Pills will be my standby in the future if ever my blood needs building up again, and I shall always find pleasure in recommending them to others."

You can get these pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Recipes For This Week

(By Betty Barclay)

SCALLOPED CORN AND CELERY

2 cups corn (canned or fresh cut).
1 cup celery (finely chopped).
1 cup buttered dry bread crumbs.
1 teaspoon salt.
1 small green pepper chopped.
2 tablespoons butter.
1 cup hot milk.

Arrange corn, peppers, celery and crumbs in two alternate layers in a buttered baking dish. Add butter to hot milk and pour over the vegetables. Cover with buttered crumbs and bake 30 to 40 minutes. Serves eight.

RICE WITH DATES

1 cup rice.
3 cups boiling water.
1 teaspoon salt.
1 cup dates.

Wash rice and add to boiling water. Add salt and boil 5 minutes. Cook in double boiler 30 minutes. Add dates, cut in pieces, and cook until rice is tender and all the water has been absorbed. Serve hot or cold with milk or cream.

Quite Simple

"Yes," said the timid passenger to the airplane pilot, "I understand I'm to sit still and not be afraid and all that, but tell me, if something happens and we fall what do I do?

"Oh, that's easy," said the pilot. "Just grab anything that we're passing and hang on."

The cheapness of Mother Graves' Worm Exterminator puts it within reach of all, and it can be got at any druggist's.

Canada's Dairy Herds

One million, four hundred and ninety thousand, three hundred and forty cows supplied milk to creameries in Canada during 1926.

For frostbite use Minard's Liniment.

She: "A fortune teller says I have a lot of money coming to me."

He: "It may be true, it may be—but I would rather hear a paying teller say that."

Life is terribly short, considering it takes the average person fifty years to accumulate just a little bit of sense.

Canadian Firm Gets Contract

Will Supply R.C.A.F. With Moth Planes To Be Assembled In Canada

The de Havilland Aircraft of Canada Limited, has received notification from the director of contracts, of the Department of National Defence that their tender for the supply of Moth aircraft for the re-equipment of the Royal Canadian Air Force had been accepted.

An order was placed immediately for thirty-four two-seater Moth light aeroplanes, twenty-eight being landplanes for the re-equipment of the Camp Borden station. These machines which will replace the old "Lynx Avros" at present in use, will be used for the training of personnel of the force and for the annual flying courses for probationary flying officers who attend during the summer months. The remaining machines are Moth seaplanes for the equipment of the station at Vancouver.

It is a significant fact that all these machines are to be equipped with the Handley-Page automatic safety slits which render an aeroplane as nearly fool-proof as possible.

The Moths will be of the latest metal fuselage type which has been specially evolved for Canadian flying conditions and recently passed all tests at Ottawa with flying colors.

The order includes six spare Gipsy engines and approximates in value almost $200,000.

The Moths will be partly manufactured in England, but assembled and tested at the de Havilland Company's plant at Mount Dennis, Ont., Delivery is to be completed by March 31.

Drives Asthma Before It. The smoke or vapor from Dr. J. D. Kellogg's Asthma Remedy gives asthma no chance to linger. It eradicates the cause. Our experience with the relief-giving remedy shows how actual and positive is the success it gives. It is the result of long study and experiment and was not submitted to the public until its makers knew it would do its work well.

The Way It Is Done Here

Canada and the United States seem queer to Europe. When they want something from one another, they buy it instead of training soldiers to take it.—Portland Express.

You may have more than you need, but you never have more than you want.

Two Hundred Mile Dog Derby Returns To North Country

Famous Mushers Will Race This Year From The Pas To the Flin Flon

After a lapse of four years, the endurance dog derby, which once thrilled the north country, and, it might even be said, the world, is returning to The Pas. The gruelling non-stop race which brought fame to Northern Manitoba and its hardy mushers will be revived at the frontier town's winter carnival, March 4 to 7. This time, romance will be added to romance. The course will be from The Pas to the famous Flin Flon mine and back, a distance of 200 miles.

Two thousand dollars in cash prizes, besides other valuable awards, and the Walter Goyne-Grant Rice memorial cup, which has an intrinsic value of $1,000, will attract mushers from wherever mushers mush. The winner will have the dog racing championship of the world.

"Shorty" Russick, veteran driver, and the youthful, though none the less noted Emil St. Godard, present world's champion, each have a leg on the memorial cup. St. Godard will be one of the leading contestants this year, and it is likely that Russick will also enter. Other noted mushers are bound to make a strong bid for more fame at the derby since it has gone back to epic proportions. Seppala, Alaska's pride, has been itching for another endurance race, his friends say, and other mushers, from both the east and the west, have already sent in their applications for entrance forms.

Drivers are already training their teams for the test in March. St. Godard's dogs are in fine shape after a summer and a fall of workouts. The team of the French-Canadian musher had been trained for the speedier, 120-mile lap races of the last three years, but Emil claims that the dogs have the endurance for the longer route. They have been harnessed to an auto chasis in the warm months and are in good condition for the snow trail.

All the color, the lure, the joys and the sorrows of the land of the northern lights is crowded into the romantic history of dog racing at The Pas.

Happiness is not in getting what you want, but in not wanting what you can't get.

Turkey has been a feature of Yuletide fare since the sixteenth century.

Powerful Medicine.—The healing properties in six essential oils are concentrated in every bottle of Dr. Thomas' Eclectric Oil, forming one of the most beneficial liniments ever offered to the use of man. Many can testify as to its power in allaying pain, and many more can certify that they owe their health to it. Its wonderful power is not expressed by the small price at which it sells.

More than 2,100 miles of motor rail postal routes were started in Germany in the past fiscal year.

RICKETS

Children with weak bones or poor dentition receive great benefit from the use of

Scott's Emulsion

It is wonderfully pure, vitamin-rich cod-liver oil and helps build a strong, healthful body, sound bones and teeth.

Scott & Bowne, Toronto, Ont. 25-66

Standards Of Intelligence

Impossible To Measure Intelligence With a Foot Rule

Dr. Edward E. Free, a noted chemist, tells the American Society of Mechanical Engineers that mechanics are the most intelligent class in the nation. Second come engineers; third, business men. Last of all, but safely out of the category of morons, come actors, preachers, doctors and college professors.

And how does Dr. Free measure intelligence? It is "the ability to reach a reasonably correct conclusion from a set of discoverable facts." But of sets of facts there are all kinds and varieties. Perhaps Dr. Free would tend to overemphasize the relative importance of chemical facts. Yet if so, one wonders why he ranks college professors so low in his scale. Surely such professors as Dr. Millikan and Dr. Compton should take high rank even on materialistic grounds. A physician like Dr. Banting, the developer of insulin, might be assumed to possess some degree of brain power and logical capacity.

Intelligence is imponderable. It is not to be tested with a foot-rule. It has as many standards as there are people to apply them. Because Shakespeare was an actor we should not be inclined to seat him below the salt at a banquet table of mechanical engineers, just one remove from the half-wits. — New York world.

CORNS

Relief in 2 Minutes

Just a drop or two of Putnam's Corn Extractor, and the pain goes away. Relief is almost instantaneous. Removing corns with "PUTNAM'S" is so easy, so sure, so painless—thousands use this wonderful remedy, and say it is the best. Don't suffer any longer, use Putnam's Corn Extractor, the one sure relief for sore corns. Sold at every drug store.

What She Reduced

Robert: "I'm never going to take Miss Townsend out to dine again. Too expensive."

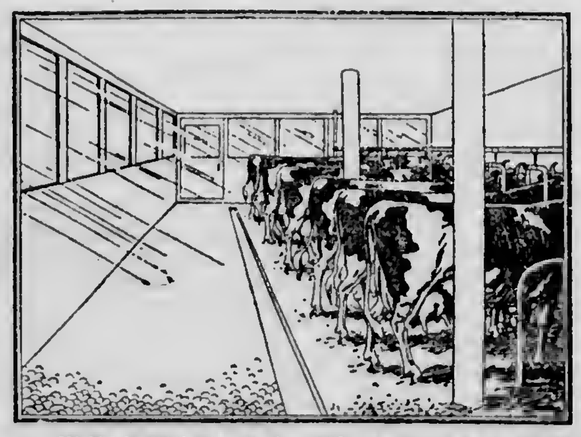
Calvin: "Why, she told me she was reducing."

Robert: "She was. She reduced my bank-roll about 15 bucks!"

Russia, which stands third in the countries of the world as regards highway mileage, is thirty-fourth in the number of automobiles.

WINDOLITE *The Improved Glass Substitute*

MADE IN ENGLAND



WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip.—cuts with an ordinary pair of scissors and is easy to fit. **WINDOLITE** is supplied in rolls any length but in one width of 36 inches only. A square yard of **WINDOLITE** weighs about 14 ozs., while a square yard of glass of ordinary thickness, weighs about 135 to 190 ozs. The improved **WINDOLITE** requires no varnish. **WINDOLITE** is made in England.

Price $1.50 Per Square Yard, f.o.b., Toronto.

Use WINDOLITE and let
YOUR PLANTS
YOUR CHICKENS
YOUR CATTLE
Bask in 100% Sunlight
Send for booklet "WINDOLITE"

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer, Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. **WINDOLITE** is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of **WINDOLITE** has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of **WINDOLITE** has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

Preparing New Calendar For Each Year Requires Six Years Of Co-Operative Effort

A letter pointing out the unnecessary inconvenience caused by the position of Christmas and New Year's day in the calendar of 1928, and giving an illuminating sketch of the intricate systems of calendar making that are undertaken each year, has been received by the editor of "Interdependence" the monthly review of the League of Nations Society in Canada, which has its headquarters at Ottawa, from Moses B. Cotsworth, well known calender expert and director of the International Fixed Calender League.

Mr. Cotsworth is the exponent of a fixed calender of thirteen months of twenty-eight days each to replace the irregular Gregorian calender now in use and points out that because Christmas fell upon a Tuesday in 1928 much inconvenience was caused to employers and employed as the majority had to return to work following the week-end, on Monday, thus interrupting the holiday and making it impossible for people to visit their frinds or relatives at distant points. Under the International Fixed Calender which is suggested as an efficient alternative to that now in vogue, Mr. Cotsworth points out that Christmas would always fall upon a Monday, as would all other holidays throughout the year, creating a long week-end haliday to the benefit of the world at large.

Dealing with the complexity of the work of preparing a new calendar for each year, Mr. Cotsworth continues: "The fact that the basis for making each year's calendar requires six years of co-operative work by the best astronomers in five leading nations, should be known to all who yearly buy or receive calendars. For example, the first calculations for the year 1933 were begun on August 17th, 1927 by eminent scientists in the Greenwich Observatory and the Nautical Almanac Office. They work out for all nations the Right Ascension and Declination of the Sun, Moon and 84 of the Fixed-Stars at each of the 24 hours, for every one of the year's 365 days.

By August, 1928, these were printed and sent to the directors of the National Observatories in the United States, Germany, France and Spain, to enable each to begin his quota of the great work they mutually shared out, so that no part is duplicated. The United States astronomers work out for all Nations, the Eclipses for the Sun and Moon, and the hourly positions of the planets with their satellites, etc. Germany calculates the hourly positions for 307 of the Fixed Stars below the Celestial Arctic Circle to the Tropic of Cancer. France works out the hourly positions for the Polar Stars within the Arctic Circle, etc. Spain does like work for 65 of the more Southerly Stars, etc.

About one and a half years later these four National Directors having printed their results will send copies to each other and to the Greenwich authorities, who will combine them in the "Nautical Almanac" for 1933 which they will print and issue about the end of 1930. The complete Nautical Almanac will then be sent to the directors of Geodetic Offices in all Nations, to enable each of them to work out from its data, the tide tables showing the daily times and heights of tides for each of his country's ports, ready for issue to the makers of calendars not later than January 1932, so that calendars for 1933 may be printed ready for distribution during the last months of 1932.

Friend—I got a touch of neuralgia.

Deadbeat—I wonder if he'd lend me anything!

First Deaf Man: "Are you going for a walk?"

Second Deaf Man: "No. I'm going for a walk."

First Deaf Man: "Oh, I thought you were going for a walk."—Buen Humor, Madrid.

Operates Big Farm

Alberta Farmer Has 1,600 Acres Included In His Holdings

Peter Hettinger, a farmer in the Morinville district, near Edmonton, Alberta, recently purchased six quarter sections, or 960 acres of land at Morinville for $57,000, an average of over $59 per acre. Fully 600 acres of this farm are under cultivation and it is one of the finest farms in the district. He is now one of the largest land owners of the Edmonton district, with 1,600 acres included in his holdings.

Mr. Hettinger came from North Dakota, U. S. A., with his parents to Morinville in 1891. He was then a boy of 14. A few years later he took up a homestead a few miles from Morinville and has gradually increased his holdings until today he owns 10 quarter-sections.

A Successful Immigrant

Man From Sweden Does Well With Farming Operations In Saskatchewan

Another instance of a successful immigrant launching out on an ambitious scale of farming is that of Andrew Anderson of Alsask, Sask. who came from Sweden in 1910; began farming a homestead of 160 acres and now farms 4,500 acres which, in 1928, yielded 54,000 bushels of Marquis wheat. But the farm is something of a show place as well containing, among other things, an arborium and an artificial lake.

Delightful Sports Mode

It simulates the two-piece mode with hip yoke inserted between diagonal closing bodice and smartly plaited skirt. The youthful neckline with shawl collar and sleeve bands add a tailored finish. Style No. 982 designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure can be made of sheer tweed, patterned wool jersey, crepe satin, canton-crepe, flat silk crepe, crepe Elizabeth, printed and plain sheer velvet and wool crepe. A few seams to join and it's finished, and made at a substantial saving. The 36-inch size requires ¾ yards of 40-inch material with ¾ yard of 40-inch contrasting. Price 25 cents in stamps or coin (coin perferred). Wrap coin carefully.

Experiments Interesting

Materials Tested Under Pressure Lose Their Familiar Properties.

Tremendous pressure has reversed almost completely the familiar properties of some well known substances in experiments at Harvard University.

Paraffin, under pressures ranging between 200,000 to 600,000 pounds n square inch, became so hard that Prof. Percy W. Bridgman pronounced it harder than machine steel. Rubber became so hard that it was pronounced usable as a die to form steel.

Dr. Bridgman found that steel tended to flow, if not like water, at least sufficiently to spread.

Oil became useless as a lubricant, because it turned solid. Mercury, after a pressure of 60,000 pounds began to escape, the theory being that its atoms were forced between those composing the steel chamber in which it was imprisoned.

One of the objectives of the experiments is to test materials used in manufacture of big guns. Another is to study the molecular and atomic changes in various substances.

Flu Epidemic In East

Forty Per Cent. Of Population Of Ontario Have Been Affected

Forty per cent. of the population of Ontario were stricken with influenza during the recent epidemic, according to figures issued at the provincial department of health, Toronto, today.

Many districts in the province had 100 per cent. of their population stricken, it was stated, while 50 per cent. of the population of Toronto had suffered from the disease.

"The number of cases is diminishing daily, but the death rate for the number of reported cases is still increasing," Dr. S. J. Bell, deputy minister of health, stated.

Odds In Her Favor

Angry Mother—"You've got a nerve to ask me to give back your ball when you nearly killed one of my children with it."

The Boy—"Well, lady, yo got six children an' we ain't got but one ball.

Canadian Industries

A recent survey of Canadian industries shows 6,500 groups of articles fully or partially manufactured in the Dominion, while approximately 1,600 Canadian firms or corporations are active exporters.

Radio Sets In Canada

It is estimated that there are about 350,000 radio sets in use in Canada, the majority of which are in the rural districts, where reception is always better than in the urban areas.

"My razor doesn't cut at all."

"Why Henry, your beard is tougher than the kitchen linoleum."

He—"A penny for your thoughts."

She—"What do you think I am—a slot machine?"

About three-fourths of the world's silk is used in the United States.

SALVATION ARMY TROUBLE

General Bramwell Booth, supreme commander of the Salvation Army, has been asked by the high council of the Army to retire from active leadership because of ill health.

Alberta As a Grain Country

Province Growing Grain Equal to Any On The Continent

W. J. Stephen, Alberta Field Crop Commissioner, who attended the Chicago International Livestock and Grain Show, where he was in charge of the provincial exhibits, states that a very favorable impression was made by the exhibits from this province, which upheld and enhanced its reputation as a grain country. He points out that Alberta won more premium money at Chicago than any State in the Union, and more than all the other provinces in Canada combined. Of the 58 entries 32 secured prizes and the concensus of opinion by those attending the show was that Alberta is growing grain equal to any on the continent.

Airplane Service In Canada

No Other Country Puts It To More Varied Use

Flying has now become a recognized part of practicality every conservation, development, and engineering service in Canada. The activities of Canadian pilots and aircraft range from observing for the sealing fleets off the Atlantic coast and forest dusting in Cape Breton Island to forest fire protection and fishery patrols on the Pacific coast; from air mail service to Peice Island, the southernmost point of Canada, to the observation of ice conditions throughout the winter in Hudson strait and transportation in the Yukon. Nowhere in the world has the aeroplane been put to more practicaland varied uses.

Sodium Sulphate Depasits

The investigation of the natural sodium sulphate deposits in Western Canada by the Department of Mines, has proved tonnage of hydrous sodium and magnesium sulphate in excess of 100,000,000 tons. There are many other deposits in the Prairie Provinces, which could produce sodium sulphate, but while the markets are limited and the price low, only those close to railways can be considered as producers at present.

NEW PICTORIAL STAMP ISSUE

Seven new stamps were issued by the post-office department and are on sale to collectors and others desiring special sets. These stamps are issued by the department to replace the old issue which is at present in use. Of the new issue the highest value is the one dolar, which is olive-green in color and depicts Canada's legislative building at Ottawa. The blue 50-cent is pink in color and depicts a harvesting scene. Next in order is the 12-cent gray, on which is shown Quebec bridge. The next three sets issued, the eight, five and three cent stamps, show a portrait of King George, and are dark blue, purple and red, respectively. The issue has been nicnimed by collectors and others as the most beautiful set ever issued by this country and one of the best issues, as far as collections of colorful stamps are concerned, in the world. Each has a large amount of scroll work around the pictures

The Dominion Fuel Board Issues Progress Report Dealing With Present Fuel Situation

The Dominion Fuel Board has issued a progress report covering the activities of the Board and the changes that the fuel situation in Canada has undergone since publication of the Board's interim report in 1923. The report contrasts conditions of five years ago, when the main fuel problem was one of supply, with those of today, and states that there is now an abundance of both native and foreign fuels for all purposes and that the major problem now is one of markets for Canadian coals.

At the time of the Board's inception a question of primary importance was to replace foreign anthracite in Central Canada by suitable alternative fuels. There had also arisen a strong national desire for a maximum of Canadian fuel independence instead of reliance on the United States for 50 per cent of the coal used. A number of broad investigations have contributed materially to the solution of the problem of an adequate supply of fuel and in part, at least, to the solution of the other problems of national independence. Ontario and Quebec, though still using large quantities of American anthracite, are no longer entirely dependent on this fuel, the producers of which are fighting here as in their own country to retain a declining market. Coke, British anthracite, low volatile coals and fuel oil are strong competitors with American anthracite in the household fuel trade, and the range of Alberta and Maritime coals is being extended through special provisions. The fact is emphasized however, that the problem of Canada's complete fuel independence is still unsolved. The geographic handicap consequent on the location of our largest markets far from our great producing fields, but in close proximity to those of the United States, is one difficult to overcome.

The Board points out that it cannot assume as its function the formulation of a national fuel policy, for this is a prerogative of Government, and any such policy, so far as it concerns complete fuel independence, must be determined largely by questions of national expediency, based however upon the most complete and accurate knowledge of all technical and economic facts obtainable. The Board is endeavouring to secure and correlate these facts. The most important point still to be ascertained is the cost of transporting coal to Ontario and Quebec from Alberta and the Maritime Provinces and the determination of this by actual test has been assigned by the Goverament to the Board of Railway Commissioners.

The report summarizes the results of widespread investigation in fuel utilization conducted by the Board through its members and in some cases with the assistance of eminent outside engineers. It is shown that technical research is opening up many possibilities for more efficient and diversified uses of coal. In the matter of low temperature carbonization of bituminous coals, the report points out the difficulty of applying in Canada methods now in operation in countries like Great Britain, France and Germany where the density of population provides a near and ready market for the products. The Board, however, is keeping in close touch with the development of the different processes so that advantages may be taken of them should they prove applicable to conditions in Canada.

The report closes with the statement that the necessity for the study of fuels and fuel problems will probably continue as long as coal is mined. A new fuel research laboratory now being completed for the Department of Mines is exceptionally well equipped, and through association with the Department the Fuel Board will avail itself of these improved facilities.

Canadian Fishing Industry

Revenue From Industry In 1928 Estimated At $54,000,000

With the completion of final returns the total value of the Canadian fishing industry for 1928 will be about $54,000,000.

The salmon pack of the Pacific coast was about 2,000,000 cases and the value over $14,000,000. The pack was the largest for five years, the increase ovr 1927 being 750,000 cases. The halibut fisheries on the Pacific coast landings totalled 30,000,000 pounds, an increase of more than 2,000,000 pounds over 1927. The total value of this fishery exceeded $3,000,000.

On the Atlantic coast, while the fisheries of New Brunswick, Prince Edward Island and the Gaspe coast were well sustaind, Nova Scotia had one of the most prosperous years since the end of the war period. Only once since 1919 have the catch and the value been greater. The catch was about 20,000,000 pounds in excess of 1927 and the total value will exceed $11,000,000.

The total investment in the Canadian fisheries is about $52,000,000 and about 85,000 persons are employed in the catching and processing of the product. The annual value of the catch, it will therefore be seen, is greater than the total investment.

Invents Unique Device

Egg-Turning Tray Is Idea Of Duchess Of Montrose

That duchesses can be good workmen as well as ladies of title has just been demonstrated by the Duchess of Montrose, who has invented a device for keeping eggs in perfect condition, either for incubation or for consumption. She calls it the Erodick egg-turning tray and it is being enthusiastically endorsed by leading agriculturists in Great Britain.

Eggs will keep fresh and fertile for a long period if they are turned half over every 12 hours but to turn a large number of eggs individually twice in 24 hours is a lengthy task. The duchess' tray takes care of the operation in about a second.

The tray is about four feet long and 16 inches wide and divided crosswise by strips of wood into 17 spaces, each holding six eggs placed end to end, that is 102 eggs in all. The eggs rest on a length of canvas three inches longer than the bottom of the tray and affixed to a roller at either end. The overlapping three inches is wound round one of the rollers and when it is necessary to turn the eggs all that is necessary is to turn the opposite roller downward so that the extra three inches of canvas is rolled about it. The eggs turn simultaneously just the required distance.

Has Horrible Name

But New Acid Is Considered Useful By Chemists

Xylotrihydroxyglutaric acid! Sounds horrible, but it's not nearly so bad as it sounds and you may be drinking it soon. In fact, Dr. Warren E. Emley of the Bureau of Standards told the American Chemical society recently that it makes good lemonade. Xylose, its drug element, is wood sugar which is made from peanut shells and cottonseed bran.

It has a sweet taste and no food value, and in addition to its possibilities as lemonade, chemists think it can be utilized as an industrial substitute for glucose and as a food for diabetes sufferers.

A Good Definition

An old darky had been in trouble for stealing chickens and was convicted on circumstantial evidence; he said.

"What is circumstantial evidence, Sam?"

"Well," he said, "as near as I kin 'splain it, fum de way it has been 'splained to me, circumstantial evidence is de feathers dat you leave lyin' around after you has done wid de chicken."

Treatment Not So Good

Bachelor—"Does your wife treat you same as she did before you were married?"

Married Man—"Not exactly. Before we were married, when I displeased her she refused to speak!"

Time For Expansion In Sheep Industry

Can Be Greatly Developed In Canada Says Expert

In a review of the sheep industry, A. A. MacMillan, chief of the sheep division of the Domiuion livestock branch, says the time seems opportune to gradually expand the industry in keeping with consumptive demand, provided the marketing of lambs can be organized on the basis of regulated marketing extending over a longer period.

The sheep indnstry can be developed and the possibilities are unlimited from the range standpoint in the prairies, the foothills and the interior of British Columbia, while in eastern Canada many thousands of farms are not carryng one per cent. of the number they should carry, the report states.

CHILDHOOD AILMENTS

Can be Quickly Banished With Baby's Own Tablets.

The ailments of childhood are many but nine-tenths of them are due to one cause and one cause only—a disordered condition of the stomach and bowels. To quickly banish any of the minor ailments of babyhood and childhood the bowels must be made to work regular and the stomach must be sweetened.

No other medicine for little ones has had such success as has Baby's Own Tablets. They banish constipation and indigestion; break up colds and simple fevers; correct diarrhoea and colic and promote healthful sleep by regulating the functions of the stomach and bowels. Concerning them Mrs. L. M. Brown, Walton, N. S., writes:—"I cannot speak to highly of Baby's Own Tablets as I have found them excellent for childhood ailments."

Baby's Own Tablets are sold by medicine dealers, or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Winnipeg Newspaper Union Fashions

Baby's New Ensemble

Give the darling new babe a right start to good health and happiness by choosing the correct garments for him, and he will repay you with his smiles and coos. Style No. 221 consists of a dress with bishop sleeves, gertrude petticoat, with or without gathered ruffle, nightgown, kimona that is perforated for short sack and a bib. To complete the layette, a band, knitted shirt and diapers should be included. Nainsook, batiste, soft lawn, muslin or cotton crepe is appropriate for all the little garments except the kimono or sack, which is usually made of cashmere, crepe de chine, flannel or flac broadcloth. A touch of embroidery gives a French appearance. Pattern for layette in one size only and costs 25 cents in stamps or coin (coin is preferred). Wrap coin carefully. Emb. No. 11127 (blue) costs 25 cents extra.

When a new acquaintance says to you:—"Oh, I've heard of you very often," one cannot but wonder what he has found out.

PROJECTED BRANCH LINES

Inventor Of Many Electrical Devices

J. W. Legg, Who Died Recently, Was Wave Scientist

The death occurred in Wilkinsburg, Pa., of Joseph Willard Legg, inventor and one of the foremost workers in the field of oscillography, or wave phenomena. He was 41 years old. A member of the meter engineering staff of the Westinghouse Electric and Manufacturing company, Mr. Legg developed many electrical devices, his greatest invention being the "osiso," a small, portable oscillograph extensively used in many branches of study. The instrument is now being used in St. Louis in experiment to help deaf persons to speak by making visual records of their voice wave.

One has been taken by Commander Richard E. Byrd on his Antarctic expedition, where it will be used in the study of radio "dead spots" and the reflection of radio waves. Its other uses include measurement of nerve responses, measuring intelligence, for the study of musical overtures, for locating oil wells, measuring ship and train vibrations and, one of its most important phases, its use as an electric cardiograph to make a complete permanent record of the action of the heart.

"Flu" Is Here In Dead Earnest

SICKNESS IN NEARLY EVERY HOME IN WESTERN CANADA

Watch your little cold—beware of everyone who is coughing or sneezing—avoid crowded places above all—stop your grippy cold at the beginning.

Doctors and nurses who have had long experience in handling grippe cases advocate **Catarrhozone Vapor** as an effective means of protection.

It is very simple to use Catarrhozone, and the whole family can enjoy its germ-killing protection at the cost of a few cents.

Put a teaspoonful of liquid Catarrhozone in a pint of water. Place this on a stove or lamp and bring the water to a boil. The vapor which rises contains the most powerful disinfectauts. As you breathe this healing vapor, you kill the germs that cause colds, catarrh, flu, and grippe. Splendid for children,—equally good for the parents. Far better to protect the whole family in this way than to have a housefull of sickness. All druggists sell Catarrhozone in 50c. bottles.

Revenue From Poultry

In 1913 revenue from the poultry industry in Alberta amounted to $2,250,000. In 1927, 14 years later, revenue from this source was $10,093,000, according to the poultry commissioner for Alberta.

In all infantile complaints that are the result of the depredations of worms in the stomach and intestines Miller's Worm Powders will be found an effective remedy. They attack the cause of these troubles, and by expelling the worms from the organs insure an orderly working of the system, without which the child cannot maintain its strength or thrive. These powders mean health and improvement.

A New York sculptress excels in carving horses out of cheese. Her horses can be melted into welsh rarebits, later emerging as nightmares.

Scientists say the earth is cooling at the rate of two degrees every sixteen million years.

SUNDAY SCHOOL LESSON

FEBRUARY 3

THE HOLY SCRIPTURES

Golden Text: Open thou mine eyes, that I may behold wondrous things out of thy law. Psalm 119.18.

Lesson: Deteronomy 6.4.9; Joshua 1.8, 9; 2 Kings 22.8-20; Nehemian 8.1-8; Psalm 19.7-14; Luke 24.25-32; Acts 17.10-12; 2 Timothy 3.14-17.

Devotional Reading: Psalm 119. 105-112.

Explanations and Comments

The Value of The Scriptures, Psalm 19.7-11—The law of Jehovah, the testimony of Jehovah, the precepts of Jehovah, the commandments of Jehovah, the ordinances of Jehovah —all of these expressions are terms for the Scriptures of the Old Testament, especially for the Sacred Law which they contain. "The Christian Church has legitimately extended the words to the larger body of Scripture which forms the Bible." This, the Psalmist declares, is perfect, restoring the soul; sure, making wise the simple; right, rejoicing the heart; pure, enlightening the eyes—"imparting refreshment and vigor to the soul, giving new life and hope: dying eyes are glazed, a sick man's eyes are heavy and dull, health brightens them"; true, and righteous altogether.

The fear of Jehovah is clean, enduring for ever. "When among the five terms, each clearly significant of the Scriptures, the Psalmist introduces the abstract expression 'the fear of the Lord,' he must mean the awe, the obedience, the discipline and inspiration of the Book whose praise is the burden of his song" (George Adam Smith).

More to be desired are they than gold, yea, than much fine gold.
"The Word like a deep, deep mine,
And jewels rich and rare
Are hidden in its mightly depths
For every searcher there."

Then with heart aglow, the Psalmist cries, "More to be desired are they than honey, and the droppings of the honeycomb"—the purest of the honey. "Moreover by them is thy servant warned; in keeping them there is great reward."

"If only we would obey the leadings of Christ, as the planets of the sun, our lives would be full of light and health and liberty. We should be restored to perfect health; our simplicity would be made wise, our hearts would be gladdened; our eyes would be enlightened; our poverty enriched, and our dispositions sweetened" (F. B. Meyer).

Form Strange Society

Wives Of Gamblers In Budapest Have Organized Union

A strange society has just been formed in Budapest. The wives of gamblers have banded themselves into an anonymous union, with the object of preventing the tragedies resulting from losses at cards. The members of the union propose to visit members of parliament and enlighten them on the tragic family conditions brought about by the gambling clubs, and eventually to make an appeal to the minister of the interior.

The organizer of this union is the destitute widow of a gambler, who drowned himself in the Danube after committing forgery to pay his gambling debts.

During her husband's lifetime she formed the habit of waiting for him in the vestibule of the card club in the small hours of the morning, and there became intimate with numbers of women who waited, trembling, at the thought of the losses which their husbands would disclose to them when they came from the card rooms.

Speeding around corners is a straight road to the hospital.

Royal Bank Annual Meeting

The sixtieth annual meeting of shareholders of The Royal Bank of Canada marked the close of the most successful year in the history of the bank. The report submitted showed that both the assets and the profits of the bank constituted a record for Canadian banking.

Dealing with the question of trade relationship between Canada and the United States, Sir Herbert Holt, the President, said:

"No country imports more goods from a single market than Canada imports from that country. The value of these imports during the twelve months ending September 30, 1928, aggregated 790 million dollars, a total more than 300 million dollars in excess of Canadian sales to that market during the same period. Such an unbalanced trade relationship is injurious to the national welfare of this country.

"In spite of the fact that the present trade relationship between the two countries is disproportionately favorable to the United States, there is active discusion of further tariff increases that seem likely to shut out the few competitive items which Canadians now sell there. It would seem that those who propose such tariff changes fail to realize that checks upon Canadian prosperity automatically check the volume of goods which can be brought from the United States, and that on the other hand continued improvement in Canadian conditions brings corresponding increases in the volume of goooss which they can sell us. From this viewpoint it might be considered economic statesmanship for the United States to discover means to increase their purchases from Canada, rather than to consider measures which will constitute new trade barriers.'

General Manager's Address

Discussing the policy of developing the latest resources of our country, Mr. Neill said in part:—

"During the past two or three years many existing industries have been reorganized to meet the requirements of expanding business. Mergers have been effected to ensure production on the most efficient basis, and many new industries have been started. Through a number of different investment bankers who are our customers, we have had the opportunity to assist in such financing, with the result that numerous new and valuable connections have been secured for the bank. I am glad to be able to report that in every such case credits granted have been liquidated to our satisfaction, and, despite the number of new issues that have been made, we are carrying no undigested securities."

He pointed out that in this period of prosperity reserves should be built up against less prosperous times. The public has the right to expect sound leadership in government and industry and with such leadership there can be no doubt concerning the wonderful prospects that the future holds in store for Canada.

Training For The Blind

Need For More Varied Occupation Says Major Timmins

Fifty per cent. of the blindnesss in the Dominion could be prevented if proper measures were taken by those liable to suffer injury to their eyes while at work or play declared Major A. N. Timmins, general manager of the Canadian National Institute of the Blind at a meeting of provincial field officials at the offees in Regina.

Major Timmins is touring the country to observe the work of the institute and in his short talk pointed out the need of an intelligent and intensive training for the blind. He declared that with such training the blind could work at almost any occupation besides the standard basketwork, reed work and broom making. In Saskatchewan alone, he said, some 150 blind persons would thus be enabled to earn their own living and not be a burden on society.

He said that over $100,000 worth of goods made by the blind had been sold in this province in 1928 by the sales department through women's organizations. Of this sum the broom sales amounted to $25,000. The total sales for the Dominion and Newfoundland totalled one million dollars.

Will Be Working Soon

Rural Credits Boards To Be Organized In Provinces

Now that the federal rural credits board has been completed, the task of organizing the provincial boards and of putting the Federal Rural Credits Act into operation will be proceeded with vigorously and it is regarded here as certain that the new loaning organization will be functioning before the spring breakup.

The most important job now is to get the provincial boards appointed. Six provinces are under the act, and, therefore, six separate boards are required. The system to be followed is that the provincial governments will submit a list of names of suitable men to the federal board and from this list the members will be chosen. It is understood that Hon. J. A. Robb, minister of finance, has written to the provinces urging early action. When all the boards are in existence, a proclamation will be issued bringing the new system into operation, and Mr. Robb will then give the federal board $5,000,000 free of interest to be used in loans to farmers. This will be a sort of revolving fund since the mortgages taken in exchange for this money will be discounted and the money so obtained used to continue the business of loaning.

Germany Buys Douglas Fir

Canadian Product Seems to Meet Requirements for Special Purposes

Douglas fir because of its superior quality in clearness and strength, is the leading Canadian product to find a sale in the German market. It is increasingly substituting for pitch pipe, because of the latter's gradual increase in price, while at the same time it has to compete against supplies from Washington and Oregon. It appears regularly to fill requirements for special purposes, being used for interior finishing, decking and deck boards, while plywood and logs are also imported when price is competitive.

Help for Asthma. Neglect gives asthma a great advantage. The trouble, once it has secured a foothold, fastens its grip on the bronchial passages tenaciously. Dr. J. D. Kellog's Asthma Remedy is daily benefiting cases of asthma of long standing. Years of suffering, however, might have been prevented had the remedy been used when the trouble was in its first stages. Do not neglect asthma, but use this preparation at once.

Roofs Made Beautiful

A roof was once something to keep out the rain. Now with the growth of air travel it is becoming something to gaze upon with a sense of the beautiful, and architects are paying attention to this new development in their art. The proof of the roof is going to be in the viewing.

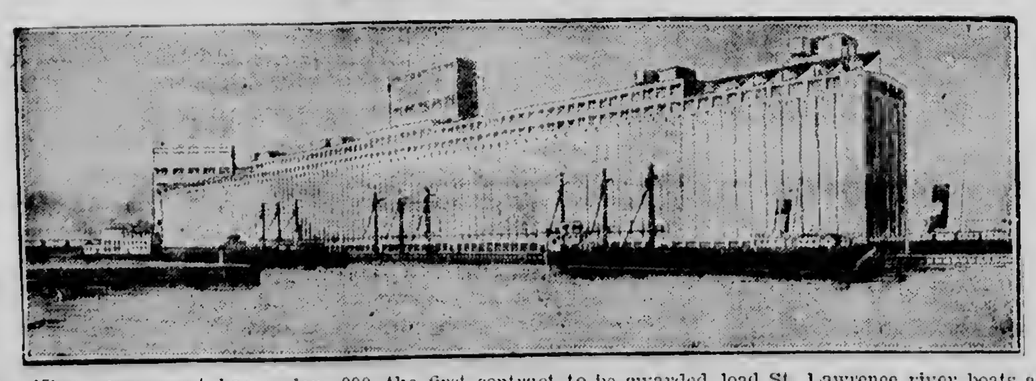
Some motorists drive as if they were anxious to have their accident quickly and have it over with.

Are You Ready When your Children Cry for It

Baby has little upsets at times. All your care cannot prevent them. But you can be prepared. Then you can do what any experienced nurse would do—what most physicians would tell you to do—give a few drops of plain Castoria. No sooner done than Baby is soothed; relief is just a matter of moments. Yet you have eased your child without use of a single doubtful drug; Castoria is vegetable. So it's safe to use as often as an infant has any little pain you cannot pat away. And it's always ready for the ernelest pangs of colic, or constipation, or diarrhea; effective, too, for older children. Twenty-five million bottles were bought last year.

Fletcher's CASTORIA

MAMMOTH GRAIN ELEVATOR



The King government has undertaken to erect a huge grain elevator two and one-half miles from Prescott. This structure will cost $4,000,000, the first contract to be awarded this month. The elevator will be able to unload up-lake vessels at the rate of 1,000,000 bushels daily and load St. Lawrence river boats at the same speed. In times of congestion railway cars can be loaded on four tracks at the same time.

Higher Tariffs Against Canadian Produce Being Discussed At Washington

Ottawn.—Public sentiment in Canada would in all probability be aroused by the action of the United States in placing tariff barriers in the paths through which formerly Canadian exports to that country passed, said A. E. Darby, secretary of the Canadian Council of Agriculture, addressing the tariff advisory board in session here. While deprecating any move on the Dominion's part to retaliate against the measures which the United States was taking to protect her industries, Mr. Darby suggested that there was possibility of Canada entertaining seriously plans for a tariff war with her southern neighbor-nation.

"On the other side of the boundary between this country and the United States," said Mr. Darby, "we see at the present time very strenuous demands indeed for the increase of tariffs against Canadian produce. We have very strong demands indeed for the increase on tariffs on Canadian agricultural products. We have demands for increases on a considerable variety of articles which enter into trade between Canada and the United States. Now, in my view, that will have two regrettable consequences. It will interfere seriously with the trade between the two countries, imposing artificial obstacles in the way of it. Every industry of Canada, indeed, must suffer. And it will create in the minds of Canadian people a temper in which they are likely to demand that some retaliatory measures be adopted.

Ratifies Kellogg Treaty

Action of Lithuania May Affect Dispute Between Russia and Poland

Kovno, Lithuania.—The Lithuanian government ratified the anti-war Kellogg pact.

Ratification of the Kellogg pact by Lithuania has significance in its bearing upon negotiations between Russia and Poland for a special protocol applying the pact in a localized sense to the states that touch the western frontier of Russia. Poland and Lithuania have been at odds over frontier questions and over the ownership of Vilna, a city which Lithuania claims as its legitimate capital but which is now held by Poland.

Inspect's Seagrave's Car

Prince of Wales Learns Things About Speed Riding

London.—The Prince of Wales, driving alone in his automobile, made one of his typical impromptu visits to a London motor house to inspect the car "Golden Arrow" and the speedboat "Miss England," with which Mnj. H. O. Seagrave intends to attack world's speed records this year.

The major happened to be present and he showed his vehicle to the prince, answering many questions about the sensations of speed riding.

Decline in Dairy Production

Winnipeg. — High spring feed prices and tempting offers by American buyers for dairy cows caused a falling off in total dairy production for 1928 in Manitoba, according to Alex. McKay, president of the butter manufacturer's section of the Manitoba Dairy association. The year, on the whole, was successful, the president intimated in his address.

Needs Britain's Protection

Iraq Is Not Sufficiently Prepared to Defend Itself

London.—Differences between the British and Iraq governments over the ability or otherwise of Iraq to defend itself have resulted in the resignation of the Iraq cabinet under Premier Aska Jafar Pasha of Askeri.

The British authorities hold the view that Iraq, placed under Britain's protection after the war, is not yet ready to assume full responsibility for its defence.

A treaty between the British and Iraq governments in 1923 provides the responsibilities of Great Britain as a mandatory power shall be terminated when Iraq is admitted to the League of Nations.

Iraq has a population of nearly 3,000,000, practically all Mohammedans. Its chief city is Bagdad, and the territory is east of Arabia, comprising 150,000 square miles.

The real difficulty it is pointed out in London is that even the existing agreements between Great Britain and Iraq are not fulfilled particularly with regard to military and financial matters, including railways and forts.

New 'Planes For B. C.

Will Increase Coast Fleet to Five Flying Boats

Vancouver. — Purchase of two modern flying boats to add to the company's fleet in British Columbia has been announced by W. L. Brintnell of Winnipeg, general manager of the Western Canada Airways, Ltd.

The two boats, Boeing B-1-E's, are the same type as those used on fisheries patrols on the the British Columbia coast last season with certain modifications growing out of last year's experiences.

"We are not planning to start a passenger air service in British Columbia at present," Mr. Brintnell said. "We will confine our operations to fisheries patrol, photographic flights, sketch mapping of timber areas and such work."

The new 'planes will give the company a fleet of five flying boats here.

Exhibition May Be Re-Established

Winnipeg Ratepayers Will Vote On Question in March

Winnipeg.—An exhibition which the promoters hope will take a prominent place among the exhibitions of the Dominion is being planned at Winnipeg, according to Wesley McCurdy, director, speaking to western exhibition authorities meeting here yesterday.

Winnipeg ratepayers will vote March 15 upon the question of whether or not they wish to authorize expenditure of $850,000 for the re-establishment of the city's exhibition.

Unemployed March to London

London.—The unemployed men marching from Glasgow to London expect to reach here about February 24. The first contingent numbers about 200 men but other parties will swell the total probably to 1,000. Two field kitchens and ambulances accompanying the marchers, who take collections and hold demonstrations en route.

Class B Fairs

New Dates Are Set At Meeting Held In Winnipeg

Winnipeg.—The establishment of an eastern and n western circuit of B class fairs, and the setting of dates for fairs in each circuit, was the principal result of a session of the Western Canadian Fairs association held at the Fort Garry hotel.

The Western Canada Association of Exhibitions, which comprises the class A fairs concluded their convention in the afternoon.

Archie Wilson of Saskatoon, heads the Western Canada Association of Exhibitions for the coming year, being elected president to succeed H. W. Abbott of Edmonton at the closing session. H. G. Smith, Regina, was re-elected vice president of the organization and S. W. Jones, Saskatoon, will continue in office as secretary-treasurer.

Johnny J. Jones was awarded the contract for midway shows at class A fairs.

Because the circuit of the Western Canada Fairs Association had become so unwieldy by reason of the large number of fairs, it was divided into two circuits, and the dates for fairs set as follows:

Eastern circuit—Carman, June 28 to July 1; Estevan, July 3 to 6; Portage la Prairie, July 8 to 10; Dauphin, July 11 to 13; Prince Albert, July 15 to 17; Melfort, July 18 to 20; Yorkton, July 22 to 27.

Western circuit—Weyburn, July 8 to 10; Assiniboia, July 11 to 13; Lethbridge, July 15 to 20; Red Deer, July 22 to 24; Camrose, July 25 to 27, Vegreville, July 29 to 31; Vermilion, Aug. 1 to 3; Lloydminster, Aug. 5 to 7; North Battleford, Aug. 8 to 10.

Crosses Atlantic In Steamer's Lifeboat

Stowaway From England Had Feet Frost-Bitten During Voyage

New York.—Matthew Badderley, youthful cheese cart driver of Cheshire county, England, completed a stormy crossing of the Atlantic in a lifeboat, an uncomfortable but not a dangerous journey, for the lifeboat all the time was hanging in its davits on the liner Lancastrian. For 10 days the stowaway stuck it out through storm and cold, living on the emergency rations in his hiding place. He kept his hands warm against his body, but his feet were frost-bitten and just before the ship reached quarantine the pain drove him forth.

He collapsed while telling his story but was revived and put to bed in the ship's hospital. He will be sent back to his cheese cart.

Root Crops Show Increase

Ottawa.—Root and fodder crops for 1928 totalled by the bureau of statistics showed not only considerable increase over the previous year's production but a considerable advance in acreage under cultivation, according to figures given out.

RECEIVES IMPORTANT POST

Dr. Charles R. Best, collaborator with Dr. F. G. Banting in the discovery of insulin, has been appointed to the chair of physiology of the University of Toronto. He succeeds Prof. J. J. R. MacLeod, who left Toronto to return to the University of Aberdeen.

Prizes For Research

Two Will Be Given for Best Work in Cancer Investigation

London.—The grand council of the British Empire cancer campaign announced approval of an offer of two prizes of $2,500 each, in 1931 and 1933, for the best original piece of work in the investigation of cancer carried out in the British Empire. They will be known as the Garton prizes.

The report of the Medical Research Council, summarizing the work of various research centers in 1927, claims malignant growths in the early stages of cancer can be removed by the radium treatment as efficaciously as by any surgical means.

Plan Air Endurance Test

Flight to Prove Claim Made for New British Plane

London.—The Mail says that a non-stop flight from Capetown to England is planned to test the claim made for a new British aeroplane that it is capable of flying further without refueling than any other in the world.

The 'plane, which has tanks for three and one-half tons of gasoline in its hollow 38-foot wing, is now being put through trail flights. Two pilots will fly it to Capetown by easy stages and attempt the return flight without a stop.

New Senator Appointed

Ottawa.—Hance J. Logan, former Liberal member for Cumberland, N. S., in the House of Commons, has been appointed to the Senate, filling the vacancy in that body caused by the death of Senator W. B. Ross. Announcement of the appointment was made at the prime minister's office.

Western Trade Boards May Ask Freight Rates Revision For Prairies

Will Adopt Pension Scheme

Ontario Decides to Follow Action of Western Provinces

Ottawa.—The province of Ontario will shortly come in under the federal old-age pension scheme. This was stated by Hon. Peter Heenan, minister of labor, to a delegation representing the Confederation of Catholic Workers of Canada, which waited upon the government.

Mr. Heenan further said that the Dominion government was prepared to discuss with the provinces, which embraced the present scheme, suggestions for improving it. The government was prepared to consider with the provinces the adoption of a contributory system of old age pensions.

It was considered advisable, however, to get the present system established before making changes. The minister of labor said he anticipated that the province of Quebec would follow Ontario and embrace the old age pension system also.

France Seeks Payment For German Sugar

Over Three Million Dollars Worth Not Paid For Is Claim

Paris.—A search for more than $3,000,000, owing the French government, was being made by police after it was revealed that reparations payments of sugar had been turned over to private concerns and not paid for.

Leon Poller, former professor of political economy at the University of Lille, has been arrested as a ringleader in the plot against the government. He is accompanying police on their visits to various concerns believed involved in the deals.

Forty thousand tons of sugar were delivered by Germany in lieu of cash as reparations payments. The sugar was turned over to the Sugar Farming company and the Franco-Moroccan Navigation company to sell, but the government has not received payment for it.

South African Tourists Greeted By Snowstorm

Students Wanted Thrill and Got It In Toronto

Toronto.—In the midst of a blinding snowstorm 37 students of South African universities arrived here in the course of their tour of United States and Canada.

"Just what we wanted," one of them exclaimed heartily, though citizens of Toronto were finding the storm troublesome.

"We were counting on Canada for the thrill of real cold weather, lots of snow and the novelty of ice hockey," T. Thorpe, Capetown university spokesman for the visitors said.

The students were the guests of Toronto university and left for Montreal for a visit to McGill university. Before completion of the tour the students will have been away from home for three months and will have travelled 25,000 miles.

Treating Drug Addicts

Geneva.—Noatake Sato, the Japanese League of Nations representative, has informed the international opium committee that Japan was successfully applying medical treatment to Korean morphine addicts. Out of 684 cases, 660 had been sent to hospitals and cured.

Sacrifices Life To Save Companion

Montreal Woman Insists on Firemen Saving Friend First

Montreal, Que.—Trapped in a top floor apartment, which she occupied with Miss Harriet Barr, a close friend, Mrs. N. Ralpe, widow of Col. W. N. Ralpe of London, England, sacrificed her life to save that of her companion in a fire which destroyed the Etonia apartment building, a four-story building here. When the firemen forced their way into the Ralpe apartment from a ladder, while the fire was sweeping the lower floors, they found Mrs. Ralpe near the window and started to carry her to safety, but she insisted that they first save Miss Barr, who was already overcome by smoke. The firemen carried Miss Barr down the ladder and returned to the top floor to find it a seething mass of smoke and flames. Their efforts to rescue Mrs. Ralpe were in vain and it was not until four hours later that they were able to make their way into the building and carry out her charred body.

To Tour Europe

Ottawa.—Arrangements have been concluded here for the European tour of a large party of Canadian club members. The group which it is expected will draw members from every part of the Dominion, is to sail from Montreal aboard the liner Laurentic June 8.

Wrote For "Punch"

London.—Rudolph Chambers Lehmann is dead at Bourne End after a long illness. He was famous as an oarsman and rowing coach and also for the light, witty verses which he contributed to "Punch."

BACK FROM THE BARRENS

Although he had not been out of the Barren lands for fifteen years, George Yandle, trapper, maintained a fine sense of civilization. The first thing he did when he got to The Pas—he did not even wait until he reached Winnipeg—was buy himself a pair of spats with zippers. Yandle acted as interpreter when Count Ilia Tolstoy entertained the Eskimos in the far north. The photograph, which was taken outside the Canadian National Railways station in Winnipeg, just after the trio's arrival, shows Yandle; Tolstoy, in the centre; and W. J. Casel, photographer. Count Tolstoy, who is the grandson of the great Russian writer and philanthropist, headed an expedition into the Barrens to study the migration habits of the caribou, and some unusual photographs were obtained of the immense herds. After spending a day in Winnipeg, the party, together with five Eskimo dogs, worth $65 apiece, went to Timagami, the Ontario forest reserve, for further study of wild animals, and thence to New York.

Demand Of Canada Favorably Considered By Radio Conference

Ottawa.—Canada's claim to 40 per cent. of the intermediate waves has, it is understood, been successfully maintained at the international radio conference meeting here.

While the proceedings continued to be closely guarded, the scheme of division is believed to be approximately 40 per cent. to Canada and 60 per cent. to the United States. Newfoundland, Cuba and Mexico will share certain of the channels.

From the fact that most of the waves have a range of only 1,000 to 1,800 miles, Newfoundland can share a number of waves with stations in the southern United States and no conflict will occur. In the same fashion Cuba and Mexico will occupy certain channels in common with Canadian transmitters.

Although the percentages eventually chosen were probably always in view, it is known that the United States was seeking a much larger share.

There are 639 channels in the band with approximately 250 channels available for distribution after allowing for amateurs and dot-and-dash stations.

Soviets Are Willing To Extend Protocol To Baltic States

Paris.—Poland's acceptance of the Soviet proposal for a protocol putting the Kellogg pact into effect immediately in eastern Europe, will yield beneficial results, it is believed, in connection with the general situation in that part of the world.

The Russians have indicated that they are willing to admit not only Poland but also Rumania and the Baltic states to the provisions of this protocol.

Because of the Bessarabian question no diplomatic relations have ever existed between the Soviet and Rumania. It is surmised that the new protocol negotiations will lead to such relations.

The protocol will also go far in quieting Soviet fears of a great aggressive plot against Russia by the capitalist states led by Great Britain.

It is significant that Poland has waited until the United States ratified the Kellogg pact before accepting the Soviet proposal.

News Notes

A missionary fnrewell party was held last Friday night in honor of Kay Redd, who left Monday for Snlt Lake City. After spending two weeks in the missionary school at Salt Lake he will take up his labors in the Mexican mission. Due to the severe weather only a fair crowd was present nt the party, but n purse of $60 was handed the missionary to help him ranch his field of labor.

Mr. C. W. Brewerton left last Tuesday for Salt Lake City on an extended visit to frieuds and relatives

"The Four Mneks", n troupe of local musical entertainers composed of Oliver, Jim and Joe McClean, and Wess McMullin returned Saturday from a trip to Sweet Grass on which they played the intermedinte towns And despite the very perverse weather conditions they report fair crowds and a pleasing reception at every place.

Miss Dorothy Costley has accepted a position at the local branch of.. the Bank of Moutreal.

Mr. C. Jensen And Mr. Norman Ross Speak Here Monday

We wish to druw your attention to the fact that a farmers meeting will be held here next Mouday evening at 8 o'clock in the Second Ward Chapel Mr. Chris Jensen, representative of the Wheat Pool, and Mr. Normau Ross will be the speakers.

This meeting is for the purpose of discussing the farmers wheat marketing problems from all angles. Questions from the farmer will be dealt with in detail. The problem of unfair grading will be discussed and any suggestions for the solution of this problem will be welcomed. The car situation will also be dealt with.

These gentlemau are highly qualified to deliver some real helpful information and your presence will help make the meeting a success.

Golfer: Just look at that girl dressed like a man—what are her parents thinking of anyway I think it's disgraceful!

Partner: Sir! that is my daughter

Golfer: Pardon me! I didn't know you were her father.

Partner: I'm not, I'm her mother.

"Don't you think doctor you are rather overcharging us for attending Jimmie when he had the measels "

"You must remember Mrs.Browne that included twenty-two visits."

"Yes, but you forget he infected the whole school!

AScotchman living on the outskirts of Toronto was engaged to a girl who got so fat that he wanted to break off the engagement. But the girl couldent get the ring off so he had to marry her.

Farmer—"Samanthy, do you want me to bring you anything from the city today?"

His wife— "Yes, Si; you might bring me a few jars of that traffic jam I see advertised in the papers."

A laundry on Fifty-seventh St. adds "Patronizing us is like making love to a young widow—you can't overdo it."

CHAPTER XI.—Continued

For hours Donald followed the expert through the mill, while the latter explained and tested the different motors.

Once a week Robert Renaie came to the mill, taking a keen interest in all phases of its construction, and invariably he went away with a pleased smile on his face.

"Never saw the old man so worked up," commented Gillis. "Guess he'd like to come up here and run her himself."

Renwick was still skeptical. For no apparent reason he had taken a dislike to Donald. "It's just 'cause you and I are such good friends," explained Gillis. "Me and him get on like a couple of strange bull-dogs."

When the huge three-storied mill, with its dry kiln, lumber skids, conveyor shed and railroad spurs, was ready for operation, and each machine had been tested, Robert Rennie arrived with other officials of the company. Next morning Donald's heart thumped as the mill's big whistle sent out its first call to work and the men filed eagerly to their posts.

The logs were sprayed with huge water-jets as they came up the chain-haul to clean them of gravel and debris. The electric "nigger" spun them about and threw them into place with a thud that shook the mill. Then in a wild crescendo of sound there rose the harsh chorus of saws: the singing howl of the cut-off, the strident, slurring sound of the gang-saws, and the staccato snarl of the trimmer.

Smiling and rubbing his hands, Robert Rennie walked through the mill. "Running like a greased pig," shouted Gillis above the clamour. The owner of the R. C. & L. Co. so far forgot his decorum as to slap the astonished Gillis heartily on the back.

Donald noticed an ever-increasing irritability on the part of the logging foreman during the next week. The erstwhile jocular Gillis became sulky and morose. Donald got an inkling as to the cause of his friend's gloom when he heard Gillis in conversation with Andy.

"What the 'ell's the matter, you big lunkus? You're like a bear with a sore foot," complained Andy.

"If my gang don't get here pretty soon, and I have to put up with this crowd of bohunks much longer, I won't be fit to live with," growled Gillis.

Short of Breath Smothering Feelings Choking Sensation

Mrs. H. Day, Dartmouth, N.S., writes:—"For over a year I was troubled with smothering spells and shortness of breath, and it was impossible for me to walk, even a short distance, because of the choking sensation which followed.

After trying many treatments, in vain, I at last decided to try

MILBURN'S HEART AND NERVE PILLS

and in a surprisingly short time they did me much good.

Price 50c per box at all druggists or dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Gillis's gang of "redshirts" were known the length and breadth of British Columbia. Employers bid high for their services, but for many years they had stuck loyally with Gillis and the R. C. & L. Co. At present they were employed by the Company in one of their camps up the coast, but at Gillis's earnest request, Robert Rennie had promised to send them to Summit Lake.

Gillis's "redshirts" had the well-earned reputation of being the wildest crew of lumber jacks west of the Rockies. "They're wild, all right," Gillis had admitted; "a swearin', drinkin', fightin' gang of roughnecks. But holy mackerel! How them boys can log!"

That night Gillis confided his troubles to Donald. "I don't know what in tarnation's to become of loggin' in years to come if things keep on as they are now," he began in a despondent tone. "It used to be that when you sent down town for loggers you got loggers. But now," with a gesture of disgust, "you git a lot of silk-stockin'd, mandolin-playin', gum-chewin', smooth-haired guys, or else a bunch of snuff-chewin', garlic-smellin', macaroni-eatin' bohunks, whose names sound like a war in Central Europe."

Sighing reminiscently, he continued: "I often wonder if it's because I'm gettin' old; but, you know, when I look back on the days, when we logged with bull teams, it seems to me that the men at that time liked to work. I can still see the old timers in their whiskers, and their big black hats and flannel shirts, as they sailed out on the old Comox or the Cassiar. He shook his head sadly. "Ah! there was only one kind of logger in them days."

Seeing that Donald was interested, he went on: "Yes, there's two kinds of loggers nowadays, Donald, the 'single-breasted' and the 'double-breasted.' And there's a hell of a lot of difference between the two. The 'single-brensted' logger is a man that don't speak anythin' but English, an' he don't belong to the 'I won't works' neither. He knows loggin' from A to Z; don't mind sleepin' in a bunk, and always carries his own blankets. If he borrows a ten-spot off you, as soon as he earns it he comes lookin' for you, slips you the money, grabs you by the hand, and lookin' you straight in the eye, says, 'Thanks, friend, come and have a drink.' At night, when he is through work, he'll smoke his pipe, grind his axe, talk about the next day's work with the boss, read the paper and go to bed. In the mornin' he'll swallow a big load of prunes and ham and eggs and go to work a-singin'.

"But this 'double-breaster'," he snorted disgustedly, "he's a mixture of a taxi-driver, bartender and soap-box orator, and just because he lives in B.C., he thinks he is a logger. He knows the difference between a fallin saw and a bucker's saw, and that just about lets him out. If he borrows a dollar off you, the minute the bill slips out of your hand you can see a look in his eye that says, 'You're hooked.' And the devil of it is that he won't cross to the other side of the street when he sees you comin', but he'll walk right up to you a-smilin' and ask you for another buck.

"When he gets through at night he cleans his finger-nails and picks on a mandolin while he tells how many Janes is stuck on him in Vancouver; gives an opinion that the shower-bath was not hot enough, and how we sufferin' workers should rise against the capitalists. He'll kick at the breakfast table because there is only oranges and no grape-fruit. When he goes in the woods he'll throw a few tools away so's to help the cause of the workers.

"Workers!" he exploded, as he came to his feet and walked the floor, "we've got too many 'double-breasteds' and 'hunks' in this camp right now, Donnie. A hunk will work if you show him a pick and shovel, but these other guys are 'trouble-breeders. Did you see that big brute that came in today?"

Donald remembered seeing an enormous man with narrow, piggish eyes, in the crowd of men sent by the employment agency.

"That's ol' Hand. He's a bad egg. I s'pose I'd ought to fire him, but he's a good logger, and they are mighty scarce 'round these diggin's." He yawned sleepily. "Got to fix a 'spar-tree' for a 'high-lead' tomorrow, so I better hit the hay."

Preparing the "spar-tree" for "high-lead," or "sky-line" rigging, is the most spectacular and thrilling performance in the logging industry. A standing tree is trimmed of top and branches, then strengthened with guys. With the pull coming from this altitude, the advantage over the straight ground pull is enormous as logs are lifted high in air over all impediments. The men who do this hazardous work are known as "high-riggers."

Next morning, a man with a short-handled axe, wearing a wide belt to pass around the tree-trunk, and a pair of lineman's spurs, slowly climbed a big fir. As he ascended he trimmed the trunk clear of limbs. Quite a crowd gathered, among them the trapper, with his rifle on his arm.

"I ain't got a 'high-rigger' in the outfit," growled Gillis. "This feller agreed to trim her, but he says he never chopped the top off one, so I guess we'll dynamite her."

The explosive, with a detonating cap, was tied around the top of the tree and wires strung to the ground. For some reason the batteries would not act, and Gillis chafed under the delay.

"I kin set her off for ye," said the old trapper.

Gillis turned to him. "How?"

The trapper tapped his gun. "Put a piece of paper on the cap so' I kin see her and I'll pop it."

"That's a new one on me," laughed Gillis.

He sent the man aloft to place a square piece of pasteboard on the cap. The men moved back from the foot of the tree, and Gillis gave the signal that all was clear. The old man sprang briskly to the top of a stump, tipped his big hat to the back of his head, and raised his rifle slowly. For an instant the long barrel wavered slightly, then steadied. The report of the rifle was drowned by a splintering crash. The heavily-branched top lifted, then came hurtling through the air to strike the ground a mass of wreckage. For a moment the big spar swayed drunkenly from the shock, then stood stark and rigid. Deprived of its fronds of green, it appeared a ghastly relic of its former self.

That afternoon, as they waited the arrival of the train, Gillis talked again of his "red-shirts." "White men, every one of them," he declared proudly, "and everyone of them with a nickname that is known all over the Coast. Ye just ought to see my two 'high-riggers,' 'Hoop-la' McKenzie and 'Blackie' Anderson. 'Blackie' is as black as an Indian, and 'Hoop-la' got his name from standing on the top of a spar tree, after he cuts her off, wavin' his hat and yellin' 'Hoop-la'.

"I got five Jack McDonalds in the gang. Their names are 'Sly' Jack, 'Fightin' Jack, 'Check-Book' Jack, 'Johnnie-On-The-Spot', and 'Crazy' Jack. An' if they had all bin named 'Crazy' Jack it wouldn't bin no mistake," he finished with a laugh.

The train rumbled to the station and the usual crowd of workers came pouring from the cars, while a crowd stood waiting to board the train. It was the same every day—men coming and men going.

Gillis uttered a glad cry, "Here they are!"

A big, ostentatious man, with broad shoulders and narrow hips, stepped to the platform. His dress was truly colourful and striking — with hat, high boots, a vivid scarlet shirt, with a cloth belt of the same bright hue tied at the side, the ends dangling loosely.

"Get out of the way, hunkies, and make room for a logger!" he roared as he elbowed his way through a crowd of scattering foreigners, behind him a line of men clad in the same brilliant attire.

"Hello, Hoop-la! you ornery ol' skate!" bellowed Gillis.

The big man turned. "Here he is fellers!" he shouted.

In a moment Gillis was surrounded by this picturesque crew, howling tumultuous greetings.

"Hello, ol' hoss!"

"Hello, you son-of-a-gun!"

"How the hell are ye?"

Donald was subjected to crushing handclasps as he was introduced to each and every one of this crowd of husky loggers.

As Donald studied them he did not wonder at Gillis's pride in these men. With the exception of Blackie, there was none under six feet in height, and they carried themselves with a loose swing that was almost a swagger. Many of them were well past middle age, some quite grey about the temples. They were all filled with the sparkling health of the great outdoors, their skins the colour of mahogany.

Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

TOOTH EXERCISE

You have read considerable of late about the "daily dozen," and other such setting-up exercises.

So you know, of course, that the body requires exercise if it is to develop and keep fit.

You have been told, too, that a vigorous chewing of your food is both beneficial and necessary as the first step in good digestion.

But perhaps you have never given thought to the beneficial affects of thorough mastication on the tooth structures themselves.

In the first place, then, there is the stimulating effect on the supporting structures of the teeth, giving them proper "tissue tone."

In the growing child, the development of the teeth, is impossible without sufficient masticatory exercise.

Former generations ate hard and coarse foods, and suffered little from dental trouble.

Mastication of such tough uncooked food gave to their teeth and jaws sufficient exercise to promote the most vigorous circulation and a very decided massage of the gums. These agencies through the abundant blood supply to the jaws provided ample tissue nourishment for growth and development along with great powers of resistance to infection.

Today, we are using a great many over-refined and pre-digested foods, which require little or no chewing, and in the use of which, even the mechanical effects from the scrubbing of the tooth surfaces are lacking, with the result that Nature working out her inexorable law, that a member that is not functioning as intended, gradually loses its efficiency, is making the tooth structure softer and less resistant to disease.

There should be, therefore, an habitual use at each meal, of foods selected not only on account of their nutrient qualities, but because they are of such a nature as to require vigorous masticatory effort.

Grippe! Flu! Influenza! Raging Through Canada

Preventive measures are advisable with so much Grippe in the air. Keep the throat and nostrils clear of infectious germs by inhaling the balsamic vapor of Catarrhozone. By this means you send the healing and soothing properties of the famous 'Blue Gum of Australia all through the air passages of the head and throat.

Catarrhozone stops a grippy cold, it's splendid for irritable throat, relieves headache and quickly drives out the germs of Flu, Influenza, Grippe and Bronchitis. Get Catarrhozone today. Complete outfit, $1.00, and lasts two months; smaller size 50c at all druggists.

Caught By Americans

Now we know why the fish don't bite any more. They are finding their way into the Great Lakes to be caught by American fishermen. Last year these fishermen took 23,796,000 pounds out of Lake Erie, 23,689,884 pounds from Lake Michigan, 15,710,731 pounds from Lake Huron, 15,301,562 pounds from Lake Superior, and 697,821 pounds from Lake Ontario.

Excellent For Croupy Children. — When a child is suffering with croup it is a good plan to use Dr. Thomas' Eclectric Oil. It reduces the inflammation and loosens the phlegm giving speedy relief to the little sufferer. It is equally reliable for sore throat and chest, earache, rheumatic pains, cuts, bruises and sprains. Dr. Thomas' Eclectric Oil is regarded by many thousands as an indispensable of the family medicine chest.

A Berlin husband advertises his matrimonial troubles in a local paper: "My pious, faithful wife has departed from me. Will the honorable finder please keep her?"

Always keep Minard's Liniment handy.

Notable Rocky Mountain Pass

Jarvis Pass, a densely timbered crossing on the Alberta-British Columbia interprovincial boundary, is remarkable for containing a number of small lakes on its summit, distributed on both sides of the watershed. The water from some of the lakes flows westward to the Pacific, while from the others it runs eastward to the Atlantic.

Santa Claus should be spelled Santa Klaws. The name is Dutch for St. Nicholas.

Experience is what one gets while looking for something else.

FROST BITTEN.

Relieve the pain of cold-nipped cheeks or ears with Minard's. It will soothe and heal.

To Check Flu-Grip

Fight the Germs with Vapors Before They Can Get a Start

Treat All Colds Promptly But Be Careful Not to Disturb the Digestion With Too Much Dosing

While Flu is so prevalent everyone should take precautions to prevent its further spread. Flu is generally accompanied by a headache, burning eyeballs, and aching joints. But it begins so many times with just an ordinary cold.

Too often, the colds are neglected until they have lowered the vitality and permitted the lurking germs of influenza, or pneumonia to "get a foothold."

The only safe plan is to attack a cold at the very start. A hot bath, a laxative, and a vigorous application of Vicks VapoRub on the throat and chest at bedtime, will usually break up a cold overnight.

External Treatment Best

For hours after Vicks is applied, its ingredients, time tested remedies, such as camphor, menthol, eucalyptus, thyme and turpentine, are vaporized by the warmth of the body, and inhaled right to the inflamed air passages. At the same time, the ointment acts through the skin like an old-fashioned poultice, "drawing out" tightness and pain, and helping the vapors to break up the congestion.

Avoid Upsetting Stomach

This simple external treatment cannot disturb your digestion as too much "dosing" is so apt to do. This is doubly important when "flu" is around, for your stomach, as well as your respiratory organs, must be kept in good condition in order to keep your body resistance at its highest level.

For this reason, too, mothers prefer Vicks for children. It can be used freely and often, even on the youngest child, with no fear of upsetting a delicate stomach.

To Help Ward Off the Flu

When influenza colds are prevalent, you can often prevent infection by snuffing a little Vicks well up the nostrils every night and morning, or before exposure to crowds.

OVER 17 MILLION JARS USED YEARLY

Little Helps For This Week

"Freely ye have received, freely give."—Matthew x. 8.

The Hand that strews the earth with flowers,
Enriched the marriage feast with wine;
The Hand once pierced for sins of ours,
This morning made the dew-drops shine.

It freely gives its very best,
Not barely what the need may be,
But for the joy of making blest;
Teach us to live and give like Thee.

Not narrowly men's claims to measure,
But daily question all our powers,—
"To whose cup can we add a pleasure,
Whose path can we make bright with flowers?"

—Elizabeth Charles.

Opportunities come reaching out their hands to us every moment, not to do great things perhaps, but for the "Little, daily, unremembered acts of kindness and of love," that take off the chill from our undemonstrative matter-of-fact intercourse with one another, and keep our hearts from starvation.—Lucy Larcom.

Hockey players use Minard's Liniment.

There is such a thing as being too persistent at times.

A PERFECT MEDICINE FOR LITTLE ONES

Baby's Own Tablets Should Be In Every Home Where There Are Children

The perfect medicine for little ones is found in Baby's Own Tablets. They are a gentle but thorough laxative which regulate the bowels, sweeten the stomach; drive out constipation and indigestion; break up colds and simple fevers and promote healthful refreshing sleep. It is impossible for Baby's Own Tablets to harm even the new-born babe, as they are absolutely guaranteed free from opiates or any other injurious drug.

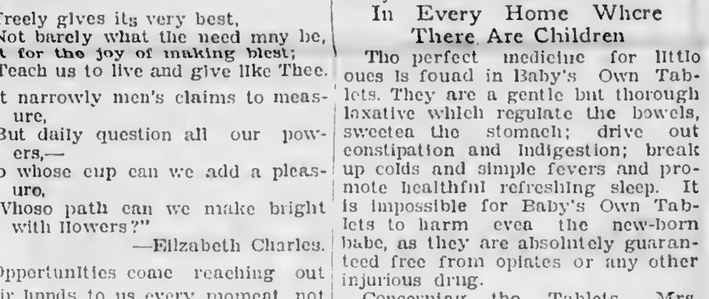
Concerning the Tablets, Mrs. Alex. J. Perry, Atlantic, N.S., writes;—"I always keep Baby's Own Tablets in the house for the children, as I have found them a perfect medicine for little ones."

Baby's Own Tablets are sold by medicine dealers, or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Maud "So you married your employer. How long did you work for him?"

Myrtle —"Until I got him."

Foods Stay Fresh Longer This Way



Covered with Para-Sani Heavy Waxed Paper goods that usually stale in a day or so stay *fresh* for quite a long time. Try it. Get Para-Sani in the handy, sanitary, knife-edged carton at grocer, druggist or stationer. For less exacting uses get "Centre Pull" Packs in sheet form.

PEERLESS BRONCHITIS REMEDY

Not a mere "COUGH SYRUP" but a real medicine for severe and obstinate coughs.

IT DOES THREE THINGS

1. It soothes the inflamed membranes, stopping throat tickle and irritation.
2. It loosens the germ laden phlegm.
3. It is absorbed into the blood, and acts directly upon the bronchial tubes.

Its internal action, plus its local effect, makes it the most effective remedy known for bronchial and flu coughs.

Trustees Convention

More than 325 delegates to the annual Alberta Trustees' convention which will be held in Lethbridge next week have applied for accommodation and assignments are now being made by Dr. Lovering, who is in charge of arrangements.

Southern delegates are urged to apply for reservations at once as the bulk of those now on file are from the north. It is expected that upwards of 600 delegates will be here as the Baker school plan is booked for discusion.

Delegates will be entertained at a luncheon at the Marquis Hotel Thursday, when Senator W. A. Buchanan will be the principal speaker.

The little boy of Mr. and Mrs. Cliff Naider met with a very painful and lamentable accident last Friday when his right hand was caught in the gears of the washing machine literal ly tearing the little finger from the hand. Amputation was necessary far below the base of the finger.

Quite a number of Lethbridge citizens attended the funeral of the late William Palmer, pioneer of the south country, held here Monday afternoon.

Owing to sickness of some of the principals in the opera "PICKLES" the date for their appearence here has been postponed until Thursday February 7th.

Pres. J. G. Allred of the North Central States Mission is a visitor in town this week.

The town puck chasers trimmed the S. of A. sextette last Wednesday evening by a score of 2—1 in the third game play off of a seriee .

MEHEW BROS.

At The S. of A.

The dance given by the Athletic Association proved a huge success. Despite the severe weathr conditions a good crowd turned out and the evening proved very enjoyable. The motif of the decoration was the portraying of Sports and Athletics. Sports equipment of all kinds pennants, shields and colors contributed to the carrying out of this idea. The dance programs were couched in terms of sports as for example, "Ladies Race" for "Ladies Choice" and "Home Stretch," for "Home Waltz" "Relay Race" for the "Circle Two Step" and the "Soda Biscuit Race" for the "Supper Waltz". Although be assured, the supper proved much more than soda biscuits.

As a culmination to the decorations a wigwam scene was portrayed in one of the halls. A very realistic campfire, tepee, and low hung moon and stars gave this a very romantic setting. One almost expected to see an Indian Maiden unfold from one of the blankets, but this did not occur. We understand that the dance also proved a financial success, but with two Scotchmen on the athletic committeec, definite information regarding this matter is not available. The athletic association is to be highly complimented on the success of this function.

Mr Asplund reports that this has been very trying weather for poultry. Seldom do we have a period of such sustained low temperatures to cope with. He has found it necessary to introduce artifical heat in the poultry house. Two brooder stoves have been kept going night and day during the cold snap. With this additional heat no combs have been froz en and production has been maintained to 65 per cent. While artifical heat for poultry cannot be generally recommended yet under special conditions such as the present it would seem advisable to resort to such prac tice in order to avoid injury to combs which will result in a marked reduction in prouction.

Mr. and Mrs. Longman entertained Dr. and Mrs. Haworth and Mr. and Mrs. Asplund at a delightful dinner on Sunday last.

Mr. and Mrs. Asplund entertained at dinner on Friday. The guests were, Mr. and Mrs. T. George Wood, and Mr. and Mrs. Gaetz.

The prize money grants from the Federal and Provincial Departments have arrived and distribution of these prizes will take place shortly.

The School volley ball team is still having poor luck. We are confident however that better days are ahead

---

We wish to apologize to those concerned regarding the publishing of the article "Canada Among the Nations," as the oration of Miss Orpha Vance. This was the address given by Miss Lenore Scoville and not by Miss Vance as it appeared. Miss Vance was the winner of the contest and we hope to he able to publish her oration sometime in the future.
